

Steven Ramage is founder and CEO of a geospatial advisory services firm called Réseau. He has been helping to support and shape open geospatial communities for more than 20 years.

Up until April 2023 Steven was Chief Engagement Officer at the intergovernmental Group on Earth Observations (GEO) Secretariat in Geneva, Switzerland. During this time Steven was a major ally to the GEO Indigenous Alliance. Today Steven is developing a network of Réseau Associates who are young women geospatial practitioners from Africa, Asia, and Latin America.

He has worked closely with United Nations (UN) offices for biodiversity, climate change, disaster risk reduction, environment, forestry, land, ocean, (fresh) water, and space topics. He has worked with the UN committee of experts for global geospatial information management (UN-GGIM) for more than a decade, including at the Secretariat in New York, USA.

He is on the Governing Boards of Digital Earth Africa, Digital Earth Pacific, and Digital Earth Americas, and was previously a member of the UK Space Agency Earth Observations Advisory Committee. Steven is a longstanding Fellow of the Royal Geographical Society.

Steven was an owner/director of 1Spatial, a private software development company, for almost ten years before taking on a role as Executive Director of the Open Geospatial Consortium (OGC), and then Managing Director of Ordnance Survey International. He is a Visiting Professor at the Institute for Future Cities, University of Strathclyde, Glasgow. He recently completed a diploma in sustainable finance at the University of Cambridge and a diploma in digital transformation at Stanford University. He tweets as @steven_ramage and can be reached on LinkedIn via <https://fr.linkedin.com/in/stevenr>
